FYI – Dan worked on one additional edit with Patty – see the parenthetical at the end of the summary on page 1. Attached is the version that is being shared with Chris (I have also updated the SharePoint version to reflect this edit).

Thanks everyone for reviewing and providing edits on such a short timeframe. I've accepted all the edits and have shared that version with Dan. If there are any additional revisions, I'll update the document at the same location on SharePoint.

Thanks again!

**Subject:** For Review Today: Pebble Status Update

Hello all,

I learned yesterday afternoon that Regional Administrator Chris Hladick is asking for an update on the status of our work on Pebble Mine. In talking to Dan, it sounds like he's looking for two items: (1) a status update of the various components – NEPA, 404, litigation, and (2) an outline of the various 3(b) options and context given the current status.

The first item is being requested since he will be in Alaska this week at the Alaska Forum on the Environment and on panel with the DEC Commissioner on Wednesday where Pebble is expected to come up. It sounds like the second item is being requested for a future update with Matt Leopold (I don't have any other details than that). I know we've talked about potential options at previous meetings, but could especially use assistance in making sure these are aligned with the group's thinking. The idea is we would also include the draft 404 Discussion Topic list for the Corps at the end of this document for Chris.

Using various talking points, meeting agendas and updates, I developed a first draft. The document can be found on Sharepoint here: [Pebble Update 2-11-20](#)

Apologies for the short turnaround time, but please provide edits **by 3pm pacific today**. Dan would like to share this with Chris by COB today and he'll want the final version in hand Wednesday morning.

Please let me know if you have questions. Thanks for your assistance.
